ACCESSORIES

Standard protections are made of a special oilproof PVC which endures temperatures ranging from -30°C (-22°F) to +100°C (212°F). For higher temperatures and/or particular applications, the use of aluminium or stainless steel protections are recommended. PVC caps and plugs have standard colours depending on the product series:

Blue colour for NV, NS, NL, SV, SS couplings.

Red colour for HNV, TNV, TNL couplings.

Yellow colour for ANV couplings.

On request they can be supplied in other colours to satisfy particular needs.

Please refer to the following tables for ordering codes.

Dust plug for female coupling

Dust cap for male coupling

Es. TMA 34 V – male plug for 12 size (3/4") ANV series coupling, female part, green colour.

ALUMINIUM HANDWHEELS

Purposely designed for big size couplings (over 1-1/4") aluminium handwheels make connection and disconnection very easy ensuring a perfect hold of the sleeve.

Series	Size	Code
